- **App Store Deployment & Testing** – 4 years
- **CI/CD** - 4 years
- **Git & Version Control** – 4 years
- **Node.js** – 4 years

EXPERIENCE

MGenio, Remote • **Flutter Developer**   *(05/2023) - Present*

At MGenio I worked with a core team of 3-5 developers to deliver mobile applications to clients. I engaged directly with project managers and teams outside of our organization that were based all over the US, Europe, and Asia. I was directly in charge of managing our team and the project for MTA, an app we developed for the New York Metro System to manage all their travel. This app served over 500,000 users.

I have also worked with bigger companies like Sherwin-Willams to develop in-house software for their teams to manage on the road employees as well as deliveries and shipments. The application also managed warehouse quantities. This application was developed for iPad.

(continue to net page)

Eqalink, Remote • **Flutter Developer**   *(10/2022) - (05/2023)*

I worked with a team of three, developing a social platform with design principals driven by a research team of psychologists . In addition to project management, I was also involved with UI/UX, and Marketing. This application was cross platform for iOS, Android, and Web. I was responsible for architecting and managing the backend as well as the front end of the application.

ABC Kids, Remote • **Flutter Developer**   *(06/2022) - (10/2022)*

I created a mobile application for an Olympic rock-climbing program in Boulder Colorado. The application centralized the programming flow of their organization and allows instructors to access curriculum from on any device. The application is for iOS, Android, and Web. I designed the app in a team of two and was responsible for frontend as well as backend development.

Kokoro Academy, Remote • **Flutter Developer**   *(10/2021) - (06/2022)*

I developed a member management system for a Jujitsu studio in Missouri. This full stack application was offered on Android, iOS, and web. It included a class management and attendance system, full payment integration, and a dedicated admin app as well.

Belay Trader, Remote • **Flutter Developer**   *(03/2020) - (10/2021)*

I worked in a team of three, to develop a social networking app for rock climbers. This app had a wide array of GPS and maps related features as well as some clever NFC features. This full stack application was exclusively mobile or iOS and Android, using Firebase and Node.js for a backend.

EDUCATION AND CERTIFICATIONS
